

The Glasgow Naturalist Information for Contributors

1. *The Glasgow Naturalist* publishes full papers, short notes and book reviews. All articles are peer reviewed by a minimum of two reviewers. The subject matter of submissions should concern the natural history of Scotland in all its aspects, including historical treatments of natural historians. Details of the journal can be found at: www.gnhs.org.uk/gnat.html
2. Full papers should not normally exceed 20 printed pages. They should be headed by the title and author, postal and e-mail addresses. Any references cited should be listed in alphabetical order under the heading References. All papers must start with a short abstract of up to 200 words, which should summarise the work. The text should normally be divided into sections with sub-headings such as Introduction, Methods, Results, Discussion, Acknowledgements and References.
3. Short notes should not normally exceed two printed pages. They should be headed by the title and author's name, postal and e-mail address. Cited references should be listed in alphabetical order under the heading References. There should be no other sub-headings. Any acknowledgements should be given as a sentence before the references. Short notes may cover, for example, new locations for a species, rediscoveries of old records, ringed birds recovered, occurrences known to be rare or unusual, interesting localities not usually visited by naturalists, and preliminary observations designed to stimulate more general interest.
4. References should be given in full according to the following style:
Pennie, I.D. (1951). Distribution of capercaillie in Scotland. *Scottish Naturalist* 63, 4-17.
O'Reilly, M., Nowacki, S. & Gerrie, E. (2018). New records of the white-banded grapple-worm. *The Glasgow Naturalist* 26(4), 96-97.
Wheeler, A. (1975). *Fishes of the World*. Ferndale Editions, London.
Smith, C.W., Aptroot, A., Coppins, B.J., Fletcher, A., Gilbert, O.L., James, P.W. & Wolseley, P.A. (2009). *The Lichens of Great Britain and Ireland*. (2nd edition). The British Lichen Society, London.
Grist, N.R. & Bell, E.J. (1996). Enteroviruses. In: Weatherall, D.J. (Editor). *Oxford Textbook of Medicine*, pp. 381-390. Oxford University Press, Oxford.
References with more than six authors: name the first six authors, then add "et al."
5. References should be cited in the text as follows:
Single author: Pennie (1915)... (Pennie, 1915). Two authors: Grist & Bell (1996)... (Grist & Bell, 1996). More than two authors: Smith *et al.* (2009)... (Smith *et al.*, 2009). Multiple citations: (Pennie, 1915; Grist & Bell, 1996). Same author(s), publications in different years: (MacGillivray, 1840, 1855).
6. An organism's genus and species names should be given in italics when first mentioned. Thereafter only the common name is required. Please use lower case initial letters for all common names, e.g. wood avens, blackbird, unless the common name includes a normally capitalised proper name, e.g. Kemp's ridley turtle. The nomenclature of vascular plants should follow Stace, C.A. (2019). *The New Flora of the British Isles*. (4th edition). C&M Floristics, Stowmarket. Normal rules of zoological nomenclature apply. When stating distribution, it may be appropriate to give information by vice-county.
7. All articles must be prepared as a word-processed document in A4 format, double-spaced throughout, with margins of 25 mm, and 12point Times New Roman font. Tables and figure legends should be typed on separate pages at the end of the manuscript.
8. Tables are numbered in arabic numerals, e.g. Table 1. These should be double-spaced on separate pages with a title and short explanatory paragraph underneath.
9. Line drawings and photographs are numbered in sequence in arabic numerals, e.g. Fig. 1. If an illustration has more than one part, each should be identified as, e.g. 9A, B etc. They should be supplied as digital images (minimum resolution 300 dpi in tif or jpeg format) either in separate files or on separate pages at the end of the manuscript: **they should not be embedded in the text**. A metric scale must be inserted in photomicrographs etc. Legends for illustrations should be typed on a separate page.
10. Articles should be submitted by e-mail to the Editor: Mr Mike G. Rutherford (E-mail: Editor@gnhs.org.uk). When submitting an article, authors should assure the Editor explicitly that all illustrations, including maps, do not infringe copyright law. **Articles will not be considered for publication without this assurance.**
11. If an author has used an Artificial Intelligence Generated Content (AIGC) tool - e.g. ChatGPT - to create any part of the manuscript, its use must be detailed in the Methods or Acknowledgements section of a full paper or in the final paragraph of a short note. The author is fully responsible for the accuracy of any information provided by the tool, including cited references. Tools that are used to improve spelling or grammar are not included in the scope of these guidelines. **The final decision about whether use of an AIGC tool is permissible in the context of a submitted manuscript lies with the Editor.**
12. When the article is accepted for publication, the author should return the corrected manuscript to the Editor as soon as possible. Final proofs will be e-mailed to authors and should be returned by e-mail as soon as possible. **Alterations at this stage should be kept to the correction of typographical or formatting errors. Proposals for more extensive alterations, which should be forwarded directly to the Editor, will be approved only in exceptional circumstances.**
13. A copy of the published article will be sent to the corresponding author as a pdf file. Offprints will not be supplied.
14. All submissions are liable to assessment by the Editor for ethical considerations, and publication may be refused on the recommendation of the Editorial Committee.
15. Authors must sign a publishing agreement giving the GNHS copyright for articles published in *The Glasgow Naturalist*. This is standard procedure for publishing in most scientific journals, and allows the article to be archived at the Biodiversity Heritage Library www.biodiversitylibrary.org/bibliography/38981#/summary
